OBJECTIVE

To leverage my passion for data analytics and my dedication as a computer science student to become a proficient and skilled professional, contributing to the field of data science while continuously expanding my knowledge and expertise.

EXPERIENCE

Executive, Data Analytics & Strategy 06/2024 - Present
Pathao, Courier Operations

- Analyzed courier data to optimize delivery efficiency and service quality.
- Developed dashboards to monitor KPIs, including sales metrics.
- Calculated sales KPIs to support revenue growth strategies.
- Collaborated with teams to enhance logistics and customer experience.
- Streamlined data processes, improving accuracy and efficiency.

EdTech Instructor, Data Analytics & Business Intelligence 05/2024 - Present
Interactive Cares

- Led a free course on SQL and Power BI, ensuring practical understanding.
- Supported a paid boot camp, assisting participants with complex concepts.
- Conducted webinars and participated in consultancy sessions.
- Delivered support and conceptual sessions on advanced data analytics topics.

EDUCATION

BSc in Computer Science and Engineering 01/2020 - 06/2024
East West University Major: Data Science

SKILLS

• Programming Language	Python, SQL, C, C++ & JavaScript
• Data Visualization	Power BI, Tableau Excel/Google Sheets, Looker Studio, Matplotlib, Plotly & Seaborn
• Database	MySQL & PostgreSQL
• Data Warehouse	Google Big Query, Redash & Snowflake.
• Statistical Analysis	EDA, A/B Testing, Root-cause Analysis, Pareto Analysis & Time Series Analysis
• Machine Learning Algorithm	Linear Regression, Logistic Regression & K-Means Clustering

PROJECTS

- **Retail Customer Cohort Analysis using Power BI**  [Live](#)
 - o Power BI enables retail cohort analysis, enhancing retention, targeting marketing, and boosting customer experience for growth and profitability.
- **Unveiling Customer Behavior with RFM Segmentation in SQL**  [Github](#)
 - o This project leverages the power of SQL to unlock customer behavior patterns through RFM analysis.
- **Customer Personality Analysis Using KMeans Clustering in Python**  [Github](#)
 - o This project leverages the power of SQL to unlock customer behavior patterns through analysis.

LANGUAGE

English and Bangla
